Emerging Colleges 2013: How small town India is catching up with the metros

SONALI ACHARJEE JUNE 14, 2013 | UPDATED 17:46 IST

Unlike his friends, Sachin Kukreja, 20, wasn't too disappointed when he didn't clear the IIT Joint Entrance Exam (JEE) in 2009. He already had a better back-up option in mind. Following in his cousin's footsteps, Kukreja took up a course in B.Tech Information Technology at Amity University, Delhi. Today he can be found either working hard to organise speakers for Amitron, their annual computer symposium, munching on a chicken doner at the university's famous 'H-Block' or chatting up a storm on the future of Internet security protocols with his professors through Amity's official iPhone app.

All you need to know about India's Best Colleges of 2013

"Not everyone can study at an IIT. Should the rest of us just waste away our young lives reappearing for entrance exams year after year until we qualify? Thankfully there are other options for students to pursue today. From French to military camp training, I have learned so much more than I expected at Amity," says Kukreja, who is planning to work with an Internet security firm in the future.

TOP EMERGING COLLEGES

ARTS

Sarojini Naidu Degree College for Women, Hyderabad
International College for Girls, Jaipur
Keshav Mahavidyalaya, Delhi
MOP Vaishnav College for Women, Chennai
Tagore P.G. Girls College, Jaipur

SCIENCE

Kristu Jayanti College, Bangalore
Keshav Mahavidyalaya, Delhi
St. Joseph's Degree & PG College, Hyderabad
Maharaja Agrasen College (MAC), Delhi
Sarojini Naidu Degree College for Women, Hyderabad

Your Complete Guide to the Best Colleges in India Stream-wise

Like Kukreja, students and parents are now much more open to exploring the option of enrolling at some of the recently established colleges. With the country now boasting of 3,393 engineering colleges that offer a collective total of 14.86 lakh seats and 3,900 management schools with a total intake of 3.5 lakh students each year, there is certainly a lot more for students to choose from.

Must See: How College Education Fares City-Wise | India's Academic Hubs of Excellence

Last year itself, the All India Council for Technical Education (AICTE) received a total of 204 new applications for engineering institutes and 86 applications for new MBA institutes to be set up. The INDIA TODAY-Nielsen Survey on emerging colleges ranks institutes that have come up in the last 20 years across the fields of arts, commerce, science, law, engineering and medicine.

List of Best Emerging Colleges: ARTS

From Belgaum Institute of Medicine in Karnataka to the Faculty of Law in Silchar, Assam, the rankings indicate that colleges that are on the rise are not restricted to the metros alone. "The last 20 years has seen a number of private institutes coming up in India. The number of institutes has increased to try and meet the growing demand," says Srikantan Moorthy, senior vice-president and group head of education and research at Infosys.

See Best Emerging Colleges: Science

Despite being relatively young, these emerging colleges have a fast-growing student community and are steadily adding to their list of achievements year after year. If a student from Galgotias University bags a Rs.50-lakh job offer from an American company, then Lovely Professional University boasts of a student community that represents over 40 Indian cities and 20 countries from around the world. It doesn't just end there. These young colleges collectively attract over 1,500 international faculty members each year who bring with them a wealth of diversity and experience.

Don't Miss Best Emerging Colleges: Commerce

LAW

Vivekananda Institute of Professional Studies, Delhi

M.S. Ramaiah College of Law, Bangalore

University Institute Of Legal Studies, Chandigarh

Faculty of Law, Dr Bhim Rao Ambedkar

University, Agra

Kalyani Government Engineering College, Kolkata

Maharaja Surajmal Institute of Technology, Delhi

HKBK College of Engineering, Bangalore

COMMERCE

Kristu Jayanti College, Bangalore

International College for Girls, Jaipur

S.M. Patel Institute of Commerce, Ahmedabad

Keshav Mahavidyalaya, Delhi

Maharaja Agrasen College (MAC), Delhi

St. Joseph's Degree & PG College, Hyderabad

Aditi Mahavidyalaya, Delhi

"This year over 14 lakh aspirants appeared for the IIT JEE, an increase of 2.8 lakh from the year before, which reflects the growing demand for technical education alone. Sadly, even all the IITs in the country have not been able to meet this demand. Students are certainly ready to explore different options for building their career and some of the newer colleges are giving them this opportunity," says Rajiv Gupta, CEO of EGE Global Education, an education consultancy. Many of the new colleges also boast of better infrastructure than the country's oldest institutes such as the 10-year-old Balaji Law College in Pune, which has its very own moot court, or Vardhman Medical College in Delhi that was set up in 2001 and currently has labs for 15 different superspecialised medical programmes.

Must See Best Emerging Colleges: Engineering

"Age is certainly not an indicator of quality education. What age does convey, however, is consistency. Going forward I think technology can play a role in colleges as it enables students to learn at their own pace. Technology also gives students a chance to learn through practical exposure. There are many new colleges today that are ready to implement technology-aided learning," adds Moorthy. With some institutes such as Amity receiving accreditation from the Institute of Engineering Technology in the UK this year, and others like Galgotias tying up with the Goethe University in Frankfurt to provide their students a semester abroad at no extra cost, it seems going global is the next step for many of colleges. "International exposure and diversity in the classroom helps broaden students' perspective and understanding of various issues.

Take a look at Best Emerging Colleges: Medicine

We are certainly looking to increase our foreign partnerships," says Suneel Galgotia, chancellor of Galgotias University. Given that over 8 lakh students enroll at private institutes each year, these new colleges certainly seem to be on the right track.
